

Isotonix®系列產品儲存方法

溫暖、潮濕的天氣容易使 Isotonix 產品出現結塊情況。結塊不會影響產品的品質，但會為使用者造成不便。為避免產品結塊，儲存時請留意以下幾點：

- 將產品存放於陰涼、乾燥處。
- 你可將產品存放於雪櫃，但請勿放於濕度較高的蔬果保鮮格中。使用產品後，上下搖晃產品後才放回雪櫃。
- 你亦可將產品放於防潮箱內，並置於陰涼、乾燥處。
- 使用產品後，立即徹底清潔及抹乾瓶蓋，特別是螺旋紋的位置，然後扭緊瓶蓋，防止濕氣進入瓶內。
- 你可使用其他量杯或量匙代替產品瓶杯及瓶蓋，以減低產品接觸濕氣的機會。
- 避免移動產品至溫差大的地方。若必須將產品由低溫移至高溫，請不時搖晃瓶身，以免產品結塊。
- 避免存放大量 Isotonix 產品（3 個月或以上用量），以減少結塊情況出現。

Isotonix® Products Storage Tips

High temperature and humidity may lead to caking of Isotonix products. Caking does not affect the quality of products. However, it may cause inconvenience to users. To avoid caking, please note the following storage tips:

- Store products in a cool, dry place.
- You may store the products in a fridge, but do not put them in the vegetable drawer where humidity is higher. After use, shake the bottles before putting them back in the fridge.
- You may also put the products in a dry box kept in a cool, dry place.
- After use, clean and dry the white cap (especially the threads inside). Then, screw the cap back tight to prevent moisture from entering.
- You may use other measuring cups or spoons instead of the overcap and white cap that come with the bottle, to reduce contact with moisture.
- Avoid moving products between places with a large temperature difference. If you must move products from a low temperature to a high temperature, shake the bottles frequently to avoid caking.
- Do not store too many Isotonix products (3 months supply or above) at a time.
