## MOONLIT PIEL

Skin this flawless doesn't even need an Instagram filter.

- For a fresh bronze glow, start by moisturizing, priming, and using a lightweight foundation.
- To carve out cheekbones, dust bronzer on your temples, sweeping it down to below your cheekbones and finishing with a pop of blush on the apple of your cheeks.
- Top off the look by swirling highlighting powder on top of cheekbones, mid nose, and temples for candlelit skin.

## NUEVA IN NUDES

Don't be afraid to go bare in public—with your *maquillaje*, that is. Celeb makeup artist Ashunta Sheriff shows us how to make neutrals sexy.

### LUSCIOUS LABIOS

Rich, tan lips are impossible to resist.

- Start by outlining lips with a lip liner for mega-staying power.
- Dab on the perfect nude lip gloss for your skin tone. Pinky taupe, ecru, and café au lait shades are best for light to medium skin. Those with darker *piel* should use mochas, bronze, and deep wines.
- For a mega-plumping effect, dust on loose gold glitter and seal with a clear gloss.

### BEDROOM OJOS

Nothing seduces like a smoky eye, especially in a palette of soft browns and golds.

- Apply a shimmering taupe shadow all over the lid, and chocolate on your crease.
- Extend a champagne shadow past the brow bone for a sexy almond shape.
- A swipe of gold eyeliner on the bottom lash line illuminates your eyes.
