Natural Flavour –  
Single Box (16 Servings)

### SG12860

Ultimate Aloe® Powder –  
Strawberry Kiwi Flavour –  
Single Box (16 Servings)

## What Makes Ultimate Aloe® Powder Unique?

Aloe vera naturally contains over 200 biologically active components. Ultimate Aloe® Powder is derived from whole leaf aloe and retains the qualities of naturally occurring Aloe vera through a proprietary extraction process called TotalAloe™. This process helps to isolate and concentrate the most active polysaccharides in aloe, while removing undesirable components such as aloin and emodin which may cause digestive upset.

Ultimate Aloe® Powder contains no artificial colours or flavours and is preservative-free. Providing 16 individual powder packets in each box, Ultimate Aloe Powder is convenient and easy to take on-the-go or share with friends.

Ultimate Aloe® Powder carries the International Aloe Science Council (IASC) seal, certifying Aloe content and purity. The Aloe vera in Ultimate Aloe® is harvested and processed according to sanitary manufacturing practices that use specific time and temperature guidelines. This preserves the natural properties of the Aloe vera plant so you receive the maximum benefits of the product. Ultimate Aloe's quality is analysed for chemical and physical characteristics by in-vitro assays for monitoring biological activity.

## Key Ingredient: Aloe vera

It is believed to have originated in the warm, dry climates of northern Africa. It has been found referenced in ancient hieroglyphics. It was first described in the *Papyrus Ebers*, an Egyptian medical book written between 1553-50 B.C.E. Aloe, in one form or another, has been used as a health agent or cosmetic ingredient for thousands of years.

The juice of the plant continues to gain in popularity as an effective health drink and testing has shown that Aloe vera contains amino acids, enzymes and a large number of other health influencing compounds.

Aloe vera is rich in polysaccharides and a source of trace minerals such as iron, copper and zinc. Minerals are important for the proper functioning of various enzyme systems in metabolic pathways and some minerals act as antioxidants.

## Frequently Asked Questions:

### How do I take Ultimate Aloe® Powder?

Pour one packet of Ultimate Aloe® Powder into 4 fl. oz./ 120 ml of water and mix well. Take once daily or as directed by your healthcare provider.

### Does Ultimate Aloe® Powder need to be refrigerated?

No, it can be stored safely at room temperature.

### Why does the taste vary?

The taste will vary from lot to lot due to the seasonal time of harvest. The sun and the amount of water the plants receive are directly responsible for the ripeness of the plants. Just as with any vegetable, you will have a different taste depending upon the growing process.

### I noticed the IASC seal on the Ultimate Aloe® Powder box. What is it and what does it mean for me?

The seal certifies that the International Aloe Science Council (IASC) has validated this product for quality and purity of aloe. IASC is an independent group of professionals that verify aloe products meet high levels of standards for quality and purity set forth by the IASC itself. Market Singapore has made a strong commitment to sell a standardised, well-defined, thoroughly tested product that meets the rigid standards of the Council.

### Why is the aloin removed from the aloe?

Fresh whole leaf aloe vera contains aloin, a very powerful laxative, which must be eliminated from the aloe if it is to be used safely as an ingredient in topical products or as a dietary supplement. When whole leaf aloe is pasteurised and the aloin is eliminated, the aloe is safe for both topical and internal use.

### How does aloe work?

Aloe vera works because the green skin of the plant produces at least six beneficial health agents: lupeol, salicylic acid, urea nitrogen, cinnamonic acid, phenol and sulphur. In addition, the plant also contains proteins (polypeptides) and at least four mannan sugars, which promote overall health.

### Who Should Use This Product?

Ultimate Aloe® is for anyone age 18 years of age or older.

### Are there any warnings or contraindications for Ultimate Aloe® Powder?

If you are currently using prescription medications, have an ongoing medical condition, or if you are pregnant or breastfeeding, you should consult your healthcare provider before using this product.

### Does Ultimate Aloe® Powder contain pork or pork products?

No.

### Is Ultimate Aloe® Powder vegetarian?

Yes.

### Is Ultimate Aloe® Powder manufactured in a GMP (Good Manufacturing Practice) facility?

Yes, this product is manufactured in a GMP compliant facility which is inspected by the Food and Drug Administration (FDA) of the United States of America.
