SQUARE

These frames tend to cover a lot of your cara, so a bold lip will really stand out. Flaming rojos rock on lighter skin, corals make tan complexions glow, and wines dominate on darker tones.

CAT EYE

Retro shades call for fierce, screen-siren-worthy brows. Dip an angled brow brush in a brow powder that's two shades lighter than your hair. Lightly outline the top and bottom of brows, then brush hairs diagonally to fill in the gaps.

ROUND

Round lenses say fun and playful (ahem, jovent!). Keep up the youthful vibe with cheeks that pop like a twerking booty. Cream blushes look natural.

These angles bring your face down. Contouring with a bronzer gives you a lift. Start below your temple, and brush under your cheekbones. Add a dab of cream highlighter on top, and voilà!
