Other measurements of success to pay attention to:

- Quality of sleep, more energy throughout the day and improved mood
- Your ability to go up and down stairs or do more push ups and sit ups
- Enjoying healthy foods more and more, less and less cravings
- More endurance during your workouts or daily routine

BODY FAT PERCENTAGE:

If you have access, obtain your initial body fat percentage (the percent of fat mass vs. lean body mass). Your TLS® coach, doctor, or local gym may have calipers or an Electrical Impedance Device (handheld or scale, like a Tanita, Omron or Rolli-fit scale) to record body fat percentage and other measurements. You may choose to invest in a scale or device that measures body fat as well. Remember, we are interested in fat loss, not just weight loss.

MEASUREMENTS:

Take full-body measurements in one-to four-week intervals, starting on the first day of your program. Use a soft tape measure to record your waist circumference and other measurements. As you follow the TLS program, you will be losing fat and inches while building muscle. One of the best ways to measure your progress without a scale is how your clothing fits you. Changes in body fat percentage and centimeters/inches are a better indicator of progress than weight alone.

SHARE YOUR PROGRESS!

At the end of your 12-week program, take "after" photos to show off all your hard work on this journey. Submit your success story to au.tlsslim.com or email your before and after pictures to findyourfit@marketamerica.com, along with your success story. Also, be sure to post your results on the TLS Facebook page. Your success and your journey will inspire others.

"Making myself a priority with TLS® is the best thing I can do for myself, my health and my loved ones."

TODAY, I'M GRATEFUL FOR:

DAILY STRESS REDUCTION:

DEEP BREATHING: Sit with your back straight; your shoulders should be relaxed (but not slouched) and facing forward • Place both hands on your stomach and inhale all the way through your nose, slowly and deeply, until you are completely filled with air • Hold for three seconds and exhale slowly (keeping your hands on your stomach) through your mouth until all the air is gone • Do this in the AM and PM, and any time during the day you need to de-stress and regroup.

WEEKLY REFLECTION

CONGRATULATIONS!

You've made it through another week of your journey with TLS® Weight Management Solution!

Eating

Eating healthy is much easier when you plan ahead. Be conscious of the amount of sugar and salt in foods. Finding foods that are naturally sweet, like carrots and apples, will help satisfy your sweet tooth. Never think of foods as "off limits" and know that every small choice you make will benefit you in the long run.

Affirmation

A moment's worth of courage is all that's required to bring about a lifestyle change — that's what this week has been about: the ability to make a different choice in that moment, which takes you down a different path. Whether it's choosing not to give in to old cravings, choosing a new form of exercise or choosing to try a new supplement, each positive choice you make moves you forward on your path to success.

Stress Reduction

You can relax by doing enjoyable things that you rarely have time to do. Finding time to do the small things that bring you pleasure can be the difference between a stressful, boring day that leads you to unhealthy habits and a refreshing day in which you find enjoyment. Even if it is as simple as getting to bed a little earlier, do it because *you* want to.
