

TLS® Full Body Routine: Weeks 1-3

It is important to know that you are not looking for perfection but progression. Any movement is better than no movement. Track each exercise. If you are not able to complete anyone of the exercises do not be discouraged. This means there is room for improvement. This is why journaling each training session you will be able to see your progress. Progress is changes in body composition, balance, strength and endurance. Do three times per week.

Equipment: Mat, beginner elastic tubing and or bands. Moderate to advance free weights (dumbbells)

Start with TLS® Dynamic Warm Up

Exercise	Duration	Instructions
Oblique Crunches	Sets: 1; Reps: 20	<ol style="list-style-type: none"> 1. Begin on your right side with your right leg slightly bent and your left leg crossed over your right leg with knee bent 2. Bend your right elbow on the floor and place your left hand on the side of your head 3. Lift your torso upward and back down, using your right elbow to maintain stability
Plank Oblique	60 Seconds	<ol style="list-style-type: none"> 1. Begin in a modified push up position with your elbows on the floor 2. Without lifting your hips, tuck your left knee up towards your left shoulder, keeping your left foot off the floor as you do so 3. Return your left leg to its original position and alternate between legs
Bicycle Kicks	Sets: 2; Reps: 20	<ol style="list-style-type: none"> 1. Begin on your back with your hands behind your head and your elbows bent 2. Keep your left leg extended, bend your right knee and draw it toward your chest as you lift your upper torso and cross your left elbow over your body to meet your right leg 3. Twist your torso and switch legs, matching your right elbow to your left knee
Forearm Plank Twist	Sets: 2; Reps: 10	<ol style="list-style-type: none"> 1. Begin with your knees on the floor and your upper body propped on bent elbows shoulder width apart 2. Extend your legs back behind you hip width apart, resting on the balls of your feet 3. Twist hips and legs to the right side 4. Hold this position for a few seconds, and then twist back to center 5. Alternate sides and repeat

Consult your physician before starting this or any other exercise program. If you experience faintness, lightheadedness, dizziness, pain or shortness of breath at any time while exercising, you should stop immediately and consult your physician or other healthcare professional. Do not start this program if your physician or healthcare provider advises against it.
