

TLS CORE Fat & Carb Metabolizer

Primary Benefits:

- ✓ Helps improve and support glucose metabolism within 2 hours after a meal
- ✓ Helps reduce the enzymatic (post prandial) digestion of carbohydrates
- ✓ Helps the body metabolize carbohydrates
- ✓ A factor in the maintenance of good health

Product Code: C6499 | 30-Day Supply

What makes TLS CORE unique:

Do you feel like you're always hungry and never full? Have you tried other products on the market but still struggle with your weight? If so, TLS CORE Fat & Carb Metabolizer was created to deal specifically with your weight management issues, by helping to reduce the digestion of carbohydrates being absorbed by the body. These carbohydrates can elevate blood sugar levels, increasing insulin levels, causing the body to store additional fat, which triggers leptin, causing you to eat and over-consume. To combat this process, TLS CORE Fat & Carb Metabolizer helps the body to metabolize carbohydrates.

First, it includes LeptiCore[®], a clinically proven, patent-pending ingredient designed specifically to promote healthy weight management. Secondly, it contains Phase 2^{®*} white kidney bean extract, another proven ingredient that research shows helps with body weight by blocking carbohydrate absorption, which means stopping carbs from being converted into fat. Finally, GreenSelect[®] Phytosome^{®†} Green Tea Decaffeinated Extract provides potent antioxidant protection while promoting consistent fat metabolism.

TLS CORE Fat & Carb Metabolizer helps inhibit the body's absorption of the carbohydrates you eat, and it reduces fat stores in the body. TLS CORE Fat & Carb Metabolizer, in combination with diet and exercise, may help you look and feel great as part of the TLS Weight Loss Solution program!
