

TLS TRIM TEA

TLS TRIM TEA
Code: UK6610 | Single Box (30 sachets)

WHAT MAKES TLS TRIM TEA UNIQUE?

TLS Trim Tea is a great gluten-free herbal supplement to add in your daily diet if you are looking for a simple and convenient way to help to achieve your diet and lifestyle health goals. Our easy-to-use sachets allow you to grab when you are on the go, making life easier.

Containing WellTrim iG (Irvingia Gabonensis/African mango) and black tea extract, TLS Trim Tea uses a three-pronged approach to help support weight management strategies, targeting: satiety, appetite control and metabolic balance. While there are other weight management competitors on the global market that use WellTrim iG, most of them do not offer a product in the form of a tea.

Patented and GRAS affirmed, WellTrim iG is a natural, clinically tested seed extract that may support your weight management strategies and may help support metabolic wellness. Research studies suggest that it might also help

promote feelings of fullness. Alongside WellTrim iG, black tea extract enhances TLS Trim Tea, as it contains antioxidants that have been shown to help support cardiovascular health.

Most teas on the market today require two to three daily servings – one serving in the morning and another in the evening. TLS Trim Tea is a powerful formula that only recommends one single daily serving. Traditionally, many slimming teas on the market often induce a laxative effect, which is a quick fix rather than a sustainable solution for long-term weight management. TLS Trim Tea contains ingredients that studies show are specifically designed to help support effective weight management.

TLS Trim Tea contains WellTrim, which studies suggest may help curb appetite and may help support metabolic balance and wellness to help promote healthy weight management strategies. Grab our easy-to-use sachets with you when you're on the go, and enjoy hot or cold.

SUGGESTED BENEFITS FOR INGREDIENTS BASED ON STUDIES:
